Exporting Data from the Dashboard

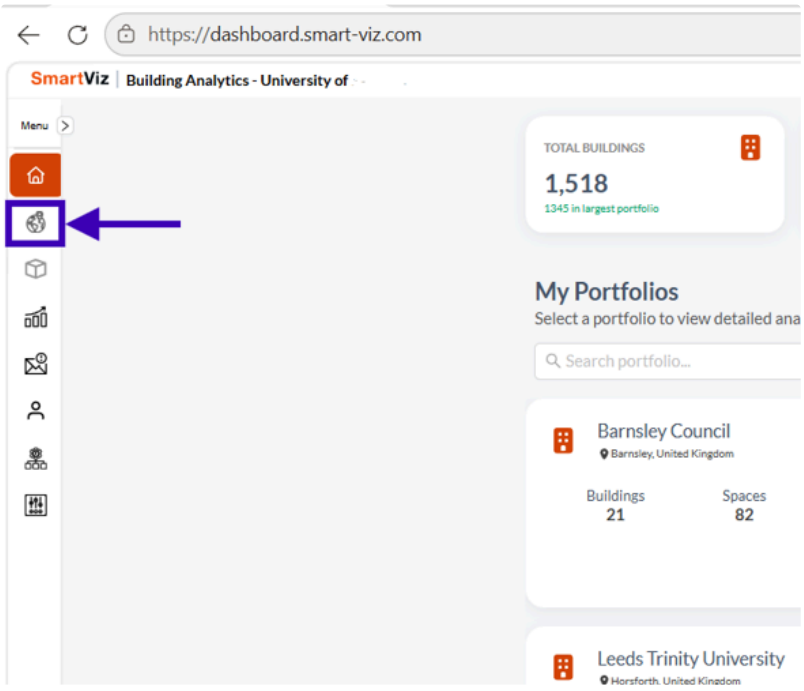

This guide explains how to export data, reports, and space information from the SmartViz dashboard.

Accessing the Export Menu

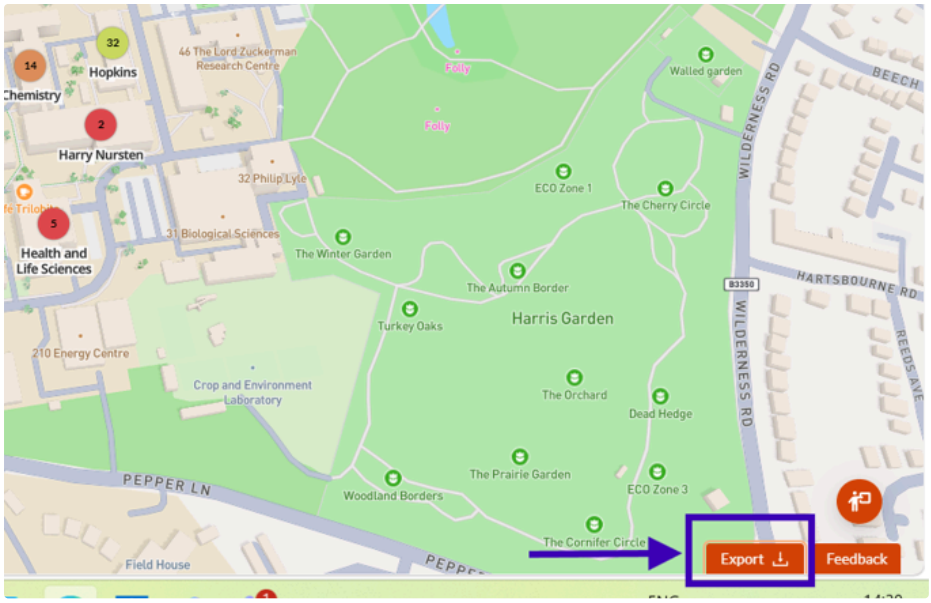

1. Go to the SmartViz Dashboard home page.
2. Select the portfolio you want to work with.

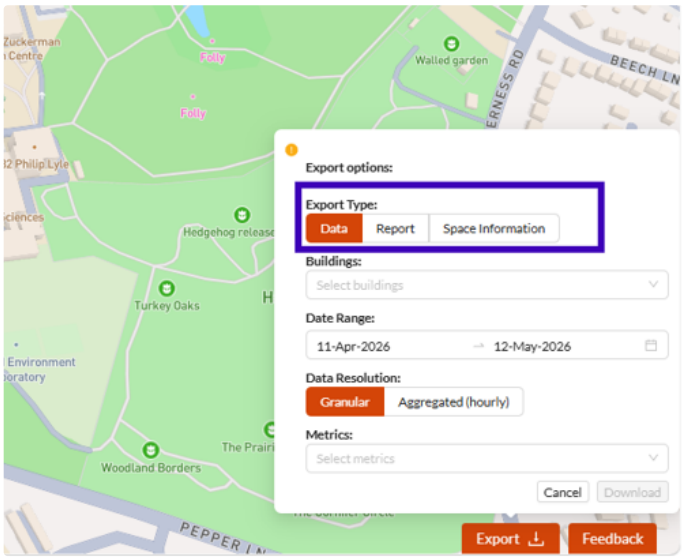

3. From the left-hand navigation panel, click the **Map View** icon.

4. On the right-hand side of the screen, click the **Export** button.

5. An export menu will appear with the following export options:
   - **Data**
   - **Report**
   - **Space Information**

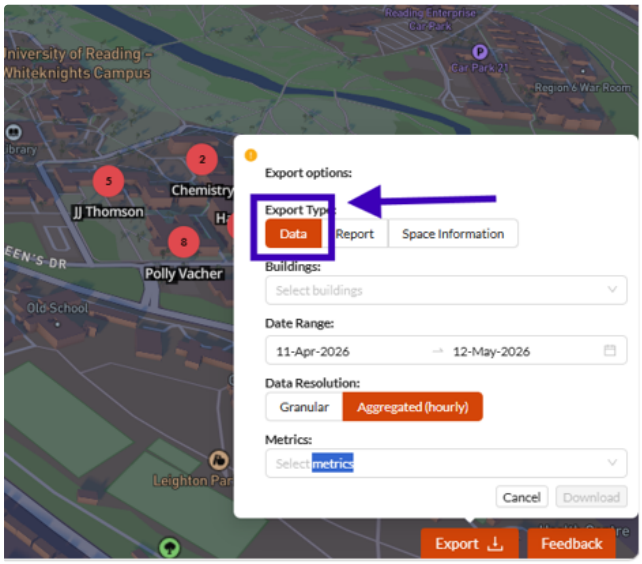

Exporting Data

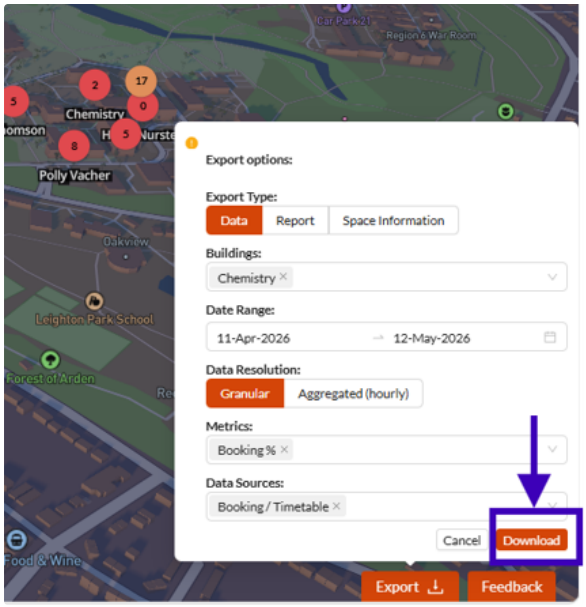

Use this option to download dashboard data in Excel format.

Steps

1. In the export menu, select **Data**.

2. Choose the building whose data you want to export.
3. Select the required date range from the **Date Range** section.
4. Choose the preferred data resolution:
   - Granular data
   - Aggregated hourly data
5. Select the metrics you want to include in the export, such as:
   - Occupancy
   - Booking
   - Utilisation
   - Temperature
   - Booking %
   - Humidity
6. After configuring all required fields, click **Download**.

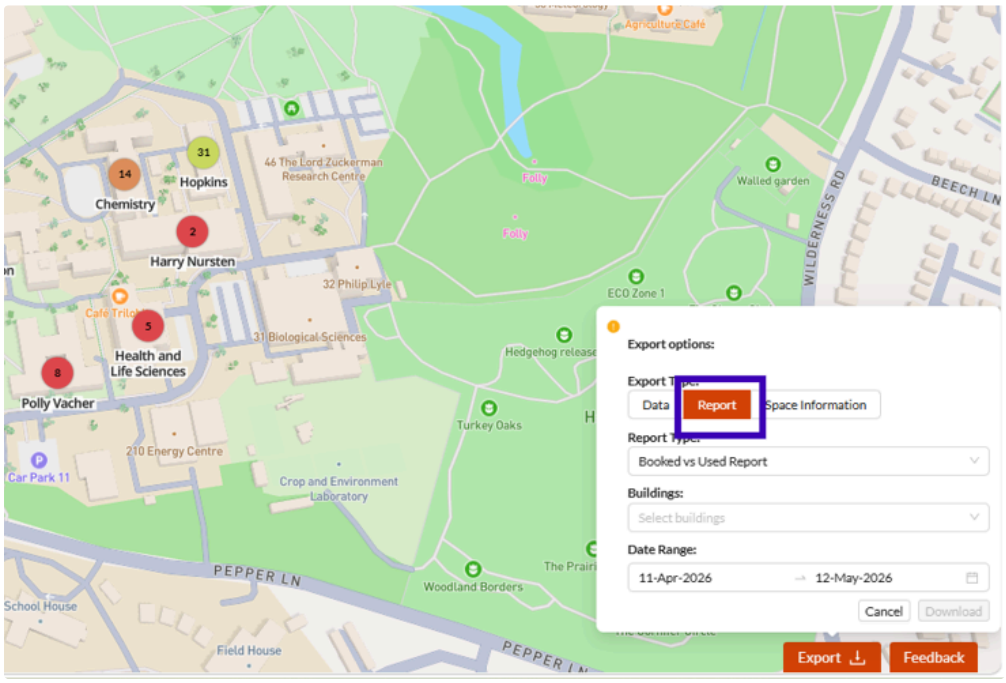

The exported file will be downloaded automatically as an Excel file to your device's default download location.

Exporting Reports

Use this option to download dashboard reports for a selected building and time period.

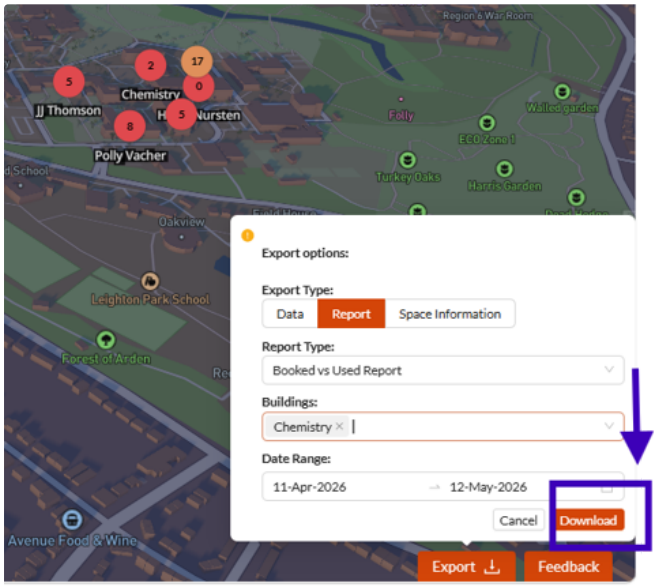

Steps

1. In the export menu, select **Report**.

2. Choose the required **Report Type**.

3. Select the building for which you want to generate the report.
4. Select the required date range.
5. Click **Download** to export the report.

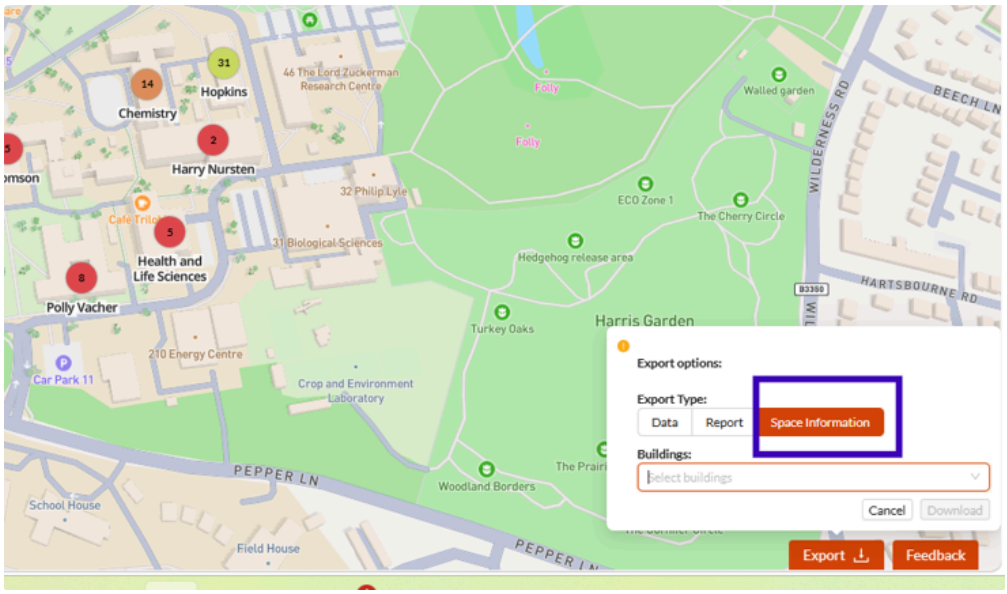

The report file will be downloaded to your device.

Exporting Space Information

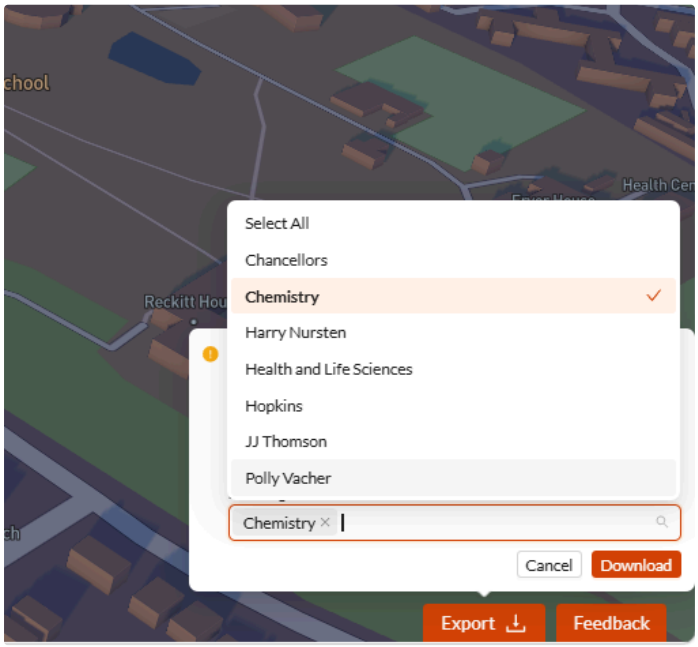

Use this option to export information related to spaces within buildings.

Steps

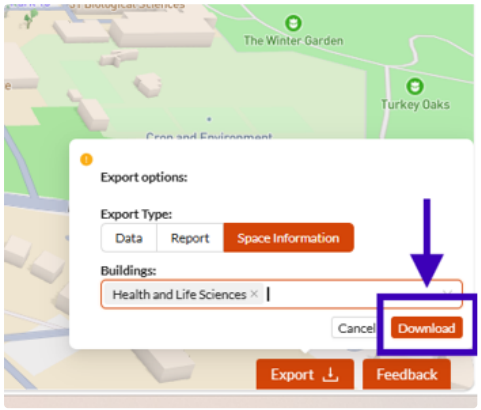

1. In the export menu, select **Space Information**.

2. Choose the building whose information you want to export.

   - To export information for a single building, select the building name from the dropdown list.
   - To export information for all buildings, select the **All** option.
3. Click **Download**.

The space information file will be downloaded automatically to your device.

Notes

- Exported files are typically downloaded in Excel format.
- Available export options and metrics may vary depending on portfolio configuration and user permissions.

- Ensure the required building and date range are selected before downloading the export file.
