Sensor Assignment Guide

Client Summary

Overview

This guide explains how to assign sensors to a portfolio using the platform. Sensors can be assigned individually or in bulk using a CSV upload. Once assigned, the sensors will appear under the portfolio and can then be mapped to spaces if required.

Assign a Single Sensor

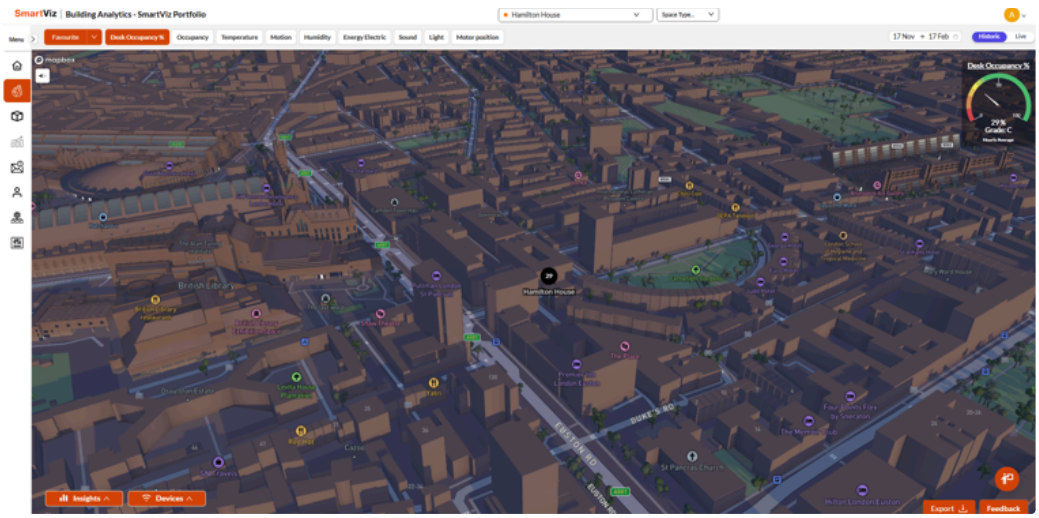

- Go to the **Devices** tab in the portfolio.
- Click **Assign New Device**.
- Select **Sensors**.
- Enter the **DevEUI** (full or last 5 digits).
- Click **Assign** to assign the sensor to the portfolio.

Assign Multiple Sensors (Bulk Upload)

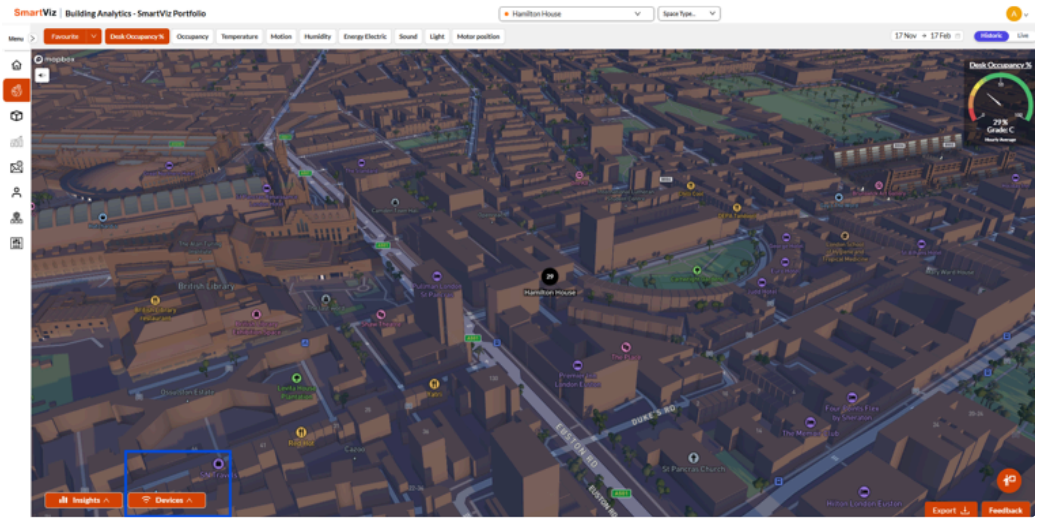

- Download the **CSV template**.
- Fill in the **Batch name** and **DevEUI values** in the file.
- Upload the CSV using **Upload Batch**.
- After uploading, verify the sensors by searching the **DevEUI** under **Available Devices**.

Technical Details Summary

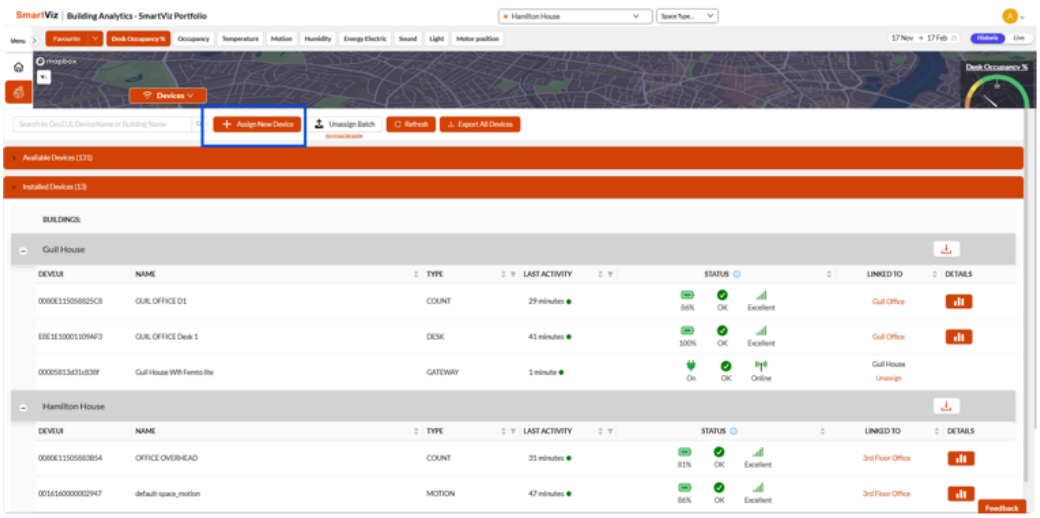

Step 1: Open the portfolio

Step 2: select the **Devices** tab, the page will look like this.

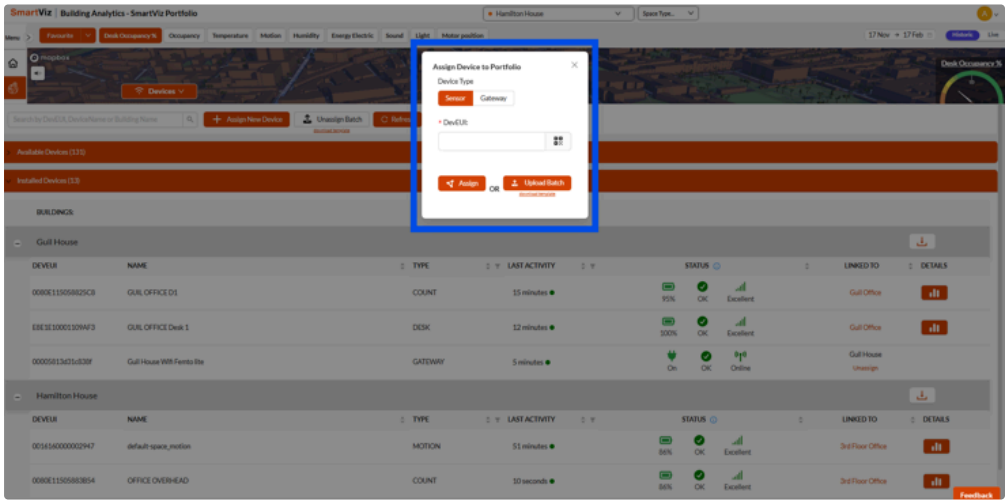

Step 3: You will see the **Assign New Device** button.

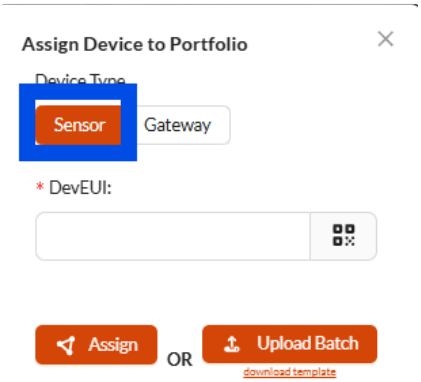

Step 4: Click on **Assign New Device**.

Step 5: After clicking, you will see two options:

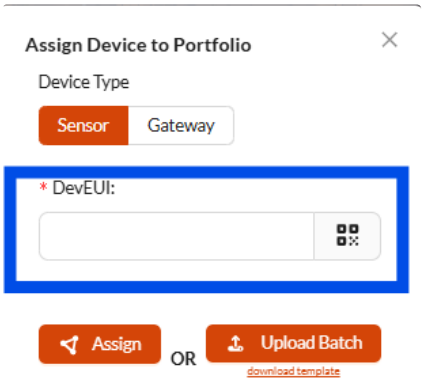

- **Sensors**
- **Gateways**

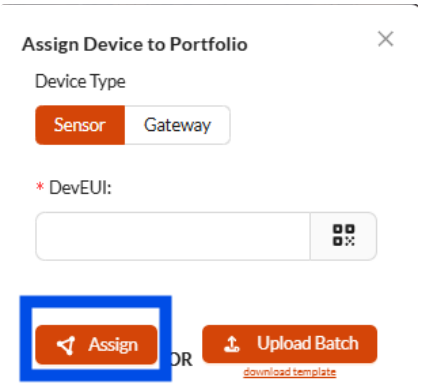

Step 6: Select the **Sensors** option.

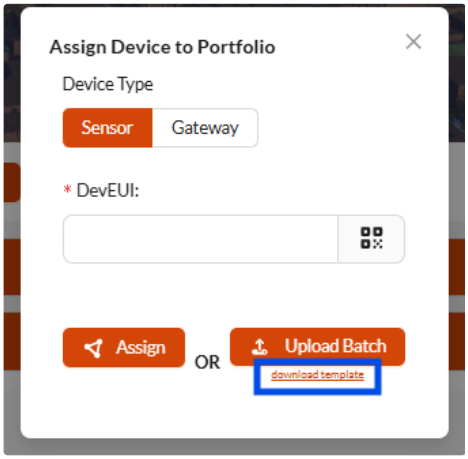

Step 7: Enter either the **last 5 digits** of the **DevEUI** or the **full DevEUI** in the bar, then click **Assign**. The sensor will be assigned to the portfolio.

Assign Multiple Sensors (Bulk Upload)

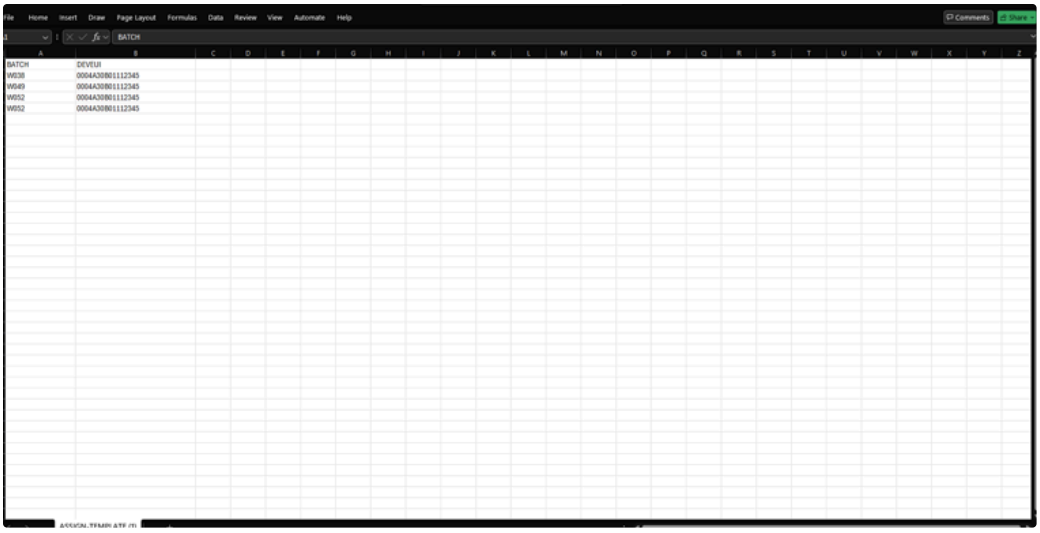

Step 8: If you want to assign multiple sensors, click on **Download Template**.

Step 9: Open the downloaded **CSV file**. You will see two columns:

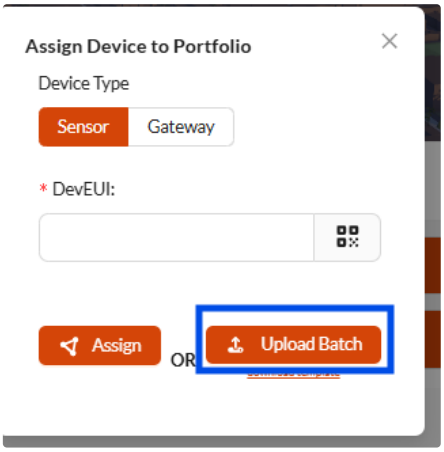

- **Batch**
- **DevEUI**

Fill in the **Batch** column with the portfolio name (or any reference name) and add the **DevEUI** numbers in the DevEUI column.

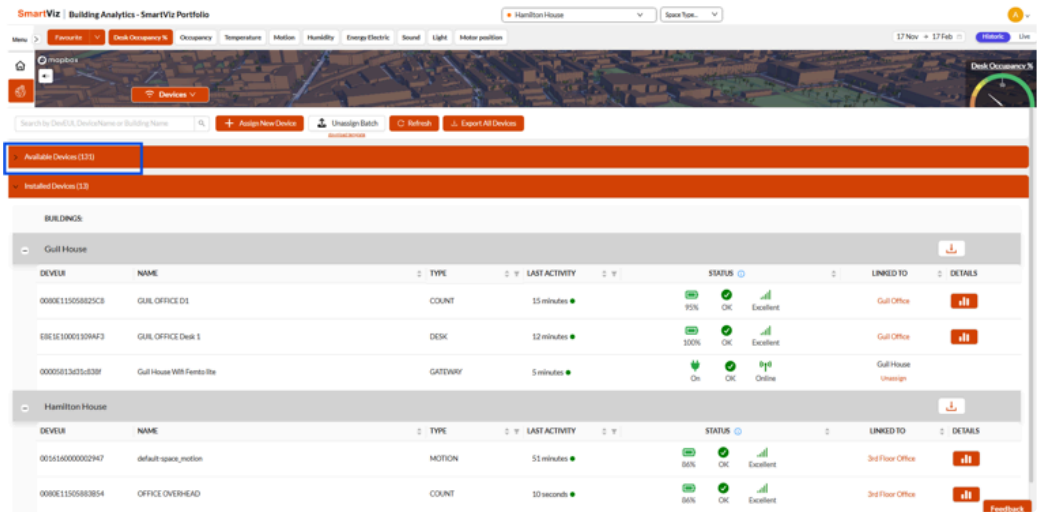

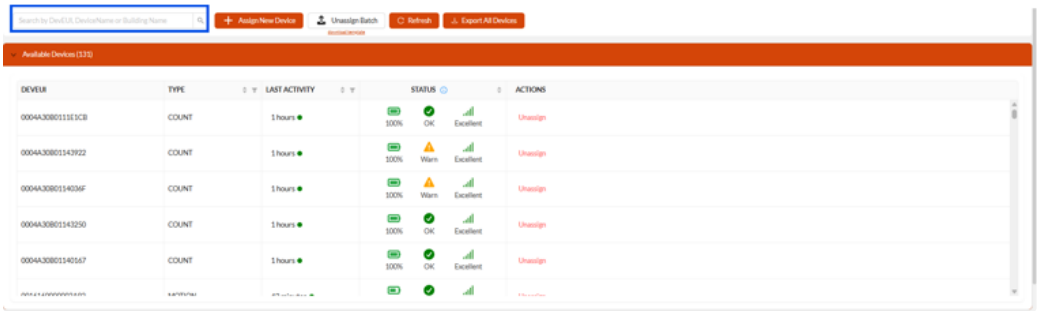

Step 10: Save the file and close it. Then return to the platform.

Step 11: Click on **Upload Batch**, upload the saved CSV file, and the sensors will be assigned to the portfolio.

Step 12: Once uploaded, recheck under **Available Devices** by searching each DevEUI. If the DevEUIs appear, it confirms that all sensors have been successfully assigned to the portfolio and the number of available device changed.
